DUNKIN' BRANDS GROUP, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements
(Unaudited)

(1) Description of Business and Organization

Dunkin' Brands Group, Inc. ("DBGI"), together with its consolidated subsidiaries, is one of the world's largest franchisors of restaurants serving coffee and baked goods as well as ice cream within the quick service restaurant segment of the restaurant industry. We develop, franchise, and license a system of both traditional and nontraditional quick service restaurants and, in limited circumstances, own and operate individual locations. Through our Dunkin' Donuts brand, we develop and franchise restaurants featuring coffee, donuts, bagels, and related products. Through our Baskin-Robbins brand, we develop and franchise restaurants featuring ice cream, frozen beverages, and related products. Additionally, our subsidiaries located in Canada and the United Kingdom manufacture and/or distribute Baskin-Robbins ice cream products to Baskin-Robbins franchisees and licensees in various international markets.

Throughout these financial statements, "Dunkin' Brands," "the Company," "we," "us," "our," and "management" refer to DBGI and its consolidated subsidiaries taken as a whole.

(2) Summary of Significant Accounting Policies

(a) Unaudited Financial Statements

The consolidated balance sheet as of March 31, 2012, and the consolidated statements of operations, comprehensive income, and cash flows for the three months ended March 31, 2012 and March 26, 2011, are unaudited.

The accompanying consolidated financial statements include the accounts of DBGI and its consolidated subsidiaries and have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC") for interim financial information. Accordingly, they do not include all of the information and footnotes required in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for complete financial statements. All significant transactions and balances between subsidiaries and affiliates have been eliminated in consolidation. In the opinion of management, all adjustments necessary for a fair presentation of such financial statements in accordance with U.S. GAAP have been recorded. Such adjustments consisted only of normal recurring items. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the fiscal year ended December 31, 2011, included in the Company's Annual Report on Form 10-K, as amended.

(b) Fiscal Year

The Company operates and reports financial information on a 52- or 53-week year on a 13-week quarter basis with the fiscal year ending on the last Saturday in December and fiscal quarters ending on the 13th Saturday of each quarter (or 14th Saturday when applicable with respect to the fourth fiscal quarter). The data periods contained within our three month periods ended March 31, 2012 and March 26, 2011 reflect the results of operations for the 13-week periods ended on those dates. Operating results for the three month period ended March 31, 2012 is not necessarily indicative of the results that may be expected for the fiscal year ending December 29, 2012.

(c) Accounting Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires the use of estimates, judgments, and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosure of contingent assets and liabilities at the date of the financial statements and for the period then ended.

(d) Fair Value of Financial Instruments

The carrying amounts of accounts receivable, notes and other receivables, assets and liabilities related to the advertising funds, accounts payable, and other current liabilities approximate fair value because of their short-term nature. For long-term receivables, we review the creditworthiness of the counterparty on a quarterly basis, and adjust the carrying value as necessary. We believe the carrying value of long-term receivables of \$4.4 million and \$4.8 million as of March 31, 2012 and December 31, 2011, respectively, approximates fair value.

Financial assets and liabilities are categorized, based on the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to the quoted prices in active markets for identical assets and liabilities and lowest priority to unobservable inputs. Observable market data, when available, is required to be used in making fair value measurements. When inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement.

[Table of Contents](#)

Financial assets and liabilities measured at fair value on a recurring basis as of March 31, 2012 are summarized as follows (in thousands):

| | Quoted prices in active markets for identical assets (Level 1) | Significant other observable inputs (Level 2) |
|-----------------------------------|--|---|
| Assets: | | |
| Mutual funds | \$ 2,743 | — |
| Total assets | <u>\$ 2,743</u> | <u>—</u> |
| Liabilities: | | |
| Deferred compensation liabilities | \$ — | 7,643 |
| Total liabilities | <u>\$ —</u> | <u>7,643</u> |

The mutual funds and deferred compensation liabilities primarily relate to the Dunkin' Brands, Inc. Non-Qualified Deferred Compensation Plan ("NQDC Plan"), which allows for pre-tax salary deferrals for certain qualifying employees. Changes in the fair value of the deferred compensation liabilities are derived using quoted prices in active markets of the asset selections made by the participants. The deferred compensation liabilities are classified within Level 2, as defined under U.S. GAAP, because their inputs are derived principally from observable market data by correlation to the hypothetical investments. The Company holds mutual funds, as well as money market funds, to partially offset the Company's liabilities under the NQDC Plan as well as other benefit plans. The changes in the fair value of the mutual funds are derived using quoted prices in active markets for the specific funds. As such, the mutual funds are classified within Level 1, as defined under U.S. GAAP.

The carrying value and fair value of long-term debt was \$1.462 billion and \$1.465 billion, respectively, as of March 31, 2012. The fair value of our term loans is estimated based on current bid prices for our term loans. As such, our term loans are classified within Level 2, as defined under U.S. GAAP.

(e) Concentration of Credit Risk

The Company is subject to credit risk through its accounts receivable consisting primarily of amounts due from franchisees and licensees for franchise fees and royalty income. In addition, we have note and lease receivables from certain of our franchisees and licensees. The financial condition of these franchisees and licensees is largely dependent upon the underlying business trends of our brands and market conditions within the quick service restaurant industry. This concentration of credit risk is mitigated, in part, by the large number of franchisees and licensees of each brand and the short-term nature of the franchise and license fee and lease receivables. At March 31, 2012, one master licensee accounted for approximately 21% of total accounts receivable, net, which was primarily due to the timing of orders and shipments of ice cream to the master licensee. No other individual franchisee or master licensee accounts for more than 10% of total revenues or accounts and notes receivable.

(f) Recent Accounting Pronouncements

In September 2011, the Financial Accounting Standards Board ("FASB") issued new guidance, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it would not need to perform the two-step impairment test for that reporting unit. This guidance was effective for the Company beginning in fiscal year 2012, and will be applied when performing our annual impairment test in the third quarter of 2012. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In May 2011, the FASB issued new guidance to clarify existing fair value guidance and to develop common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with GAAP and International Financial Reporting Standards. This guidance was effective for the Company beginning in fiscal year 2012. The adoption of this guidance did not have a material impact on our consolidated financial statements.

(g) Subsequent Events

Subsequent events have been evaluated through the date these consolidated financial statements were filed.

| | | \$1,664,658 | (157,439) | 1,507,219 |

[Table of Contents](#)

The changes in the gross carrying amounts of other intangible assets from December 31, 2011 to March 31, 2012 are primarily due to the impact of foreign currency fluctuations.

Total estimated amortization expense for fiscal years 2012 through 2016 is presented below (in thousands). The amount reflected below for fiscal year 2012 includes year-to-date amortization.

| Fiscal year: | |
|---------------------|----------|
| 2012 | \$26,982 |
| 2013 | 26,283 |
| 2014 | 25,679 |
| 2015 | 25,323 |
| 2016 | 22,362 |

The impact of our unfavorable leases acquired resulted in an increase in rental income and a decrease in rental expense as follows (in thousands):

| | Three months ended | |
|------------------------------------|---------------------------|---------------------------|
| | March 31, 2012 | March 26, 2011 |
| Increase in rental income | \$ 265 | 374 |
| Decrease in rental expense | 351 | 478 |
| Total increase in operating income | <u>\$ 616</u> | <u>852</u> |

(5) Debt

Borrowings under the senior credit facility of Dunkin' Brands, Inc. ("DBI"), a subsidiary of DBGI, bear interest at a rate per annum equal to an applicable margin plus, at our option, either (1) a base rate determined by reference to the highest of (a) the Federal Funds rate plus 0.5%, (b) the prime rate, (c) the LIBOR rate plus 1.0%, and (d) 2.0% or (2) a LIBOR rate provided that LIBOR shall not be lower than 1.0%. The applicable margin under the term loan facility is 2.0% for loans based upon the base rate and 3.0% for loans based upon the LIBOR rate. The effective interest rate for term loans, including the amortization of original issue discount and deferred financing costs, was 4.4% at March 31, 2012.

Repayments are required to be made under the term loans equal to approximately \$15.0 million per calendar year, payable in quarterly installments through September 2017, with the remaining principal balance due in November 2017. Additionally, following the end of each fiscal year, if DBI's leverage ratio, which is a measure of DBI's outstanding debt to earnings before interest, taxes, depreciation, and amortization, adjusted for certain items (as specified in the senior credit facility), exceeds 4.00x, the Company is required to prepay an amount equal to 25% of excess cash flow (as defined in the senior credit facility) for such fiscal year. Under the terms of the senior credit facility, the first excess cash flow payment was due in the first quarter of fiscal year 2012 based on fiscal year 2011 excess cash flow and leverage ratio. In December 2011, the Company made an additional principal payment of \$11.8 million that was applied to the 2011 excess cash flow payment due in the first quarter of 2012. Based on fiscal year 2011 excess cash flow, considering all payments made, the excess cash flow payment required in the first quarter of 2012 was \$2.4 million. The excess cash flow payments may be applied to required principal payments. However, the Company intends on making quarterly payments of \$4.0 million, which are reflected in the current portion of long-term debt at March 31, 2012. Other events and transactions, such as certain asset sales and incurrence of debt, may trigger additional mandatory prepayments.

(6) Other Current Liabilities

Other current liabilities consisted of the following (in thousands):

| | March 31, 2012 | December 31, 2011 |
|--------------------------------------|---------------------------|------------------------------|
| Gift card/certificate liability | \$ 93,262 | 144,965 |

(7) Segment Information

The Company is strategically aligned into two global brands, Dunkin' Donuts and Baskin-Robbins, which are further segregated between U.S. operations and international operations. As such, the Company has determined that it has four operating segments, which are its reportable segments: Dunkin' Donuts U.S., Dunkin' Donuts International, Baskin-Robbins U.S., and Baskin-Robbins International. Dunkin' Donuts U.S., Baskin-Robbins U.S., and Dunkin' Donuts International primarily derive their revenues through royalty income, franchise fees, and rental income. Baskin-Robbins U.S. also derives revenue through license fees from a third-party license agreement. Baskin-Robbins International primarily derives its revenues from the manufacturing and sales of ice cream products, as well as royalty income, franchise fees, and license fees. The operating results of each segment are regularly reviewed and evaluated separately by the Company's senior management, which includes, but is not limited to, the chief executive officer and the chief financial officer. Senior management primarily evaluates the performance of its segments and allocates resources to them based on earnings before interest, taxes, depreciation, amortization, impairment charges, loss on debt extinguishment and refinancing transactions, other losses, and unallocated corporate charges, referred to as segment profit. When senior management reviews a balance sheet, it is at a consolidated level. The accounting policies applicable to each segment are consistent with those used in the consolidated financial statements.

Subsequent to December 31, 2011 and as part of fiscal year 2012 management reporting, retail sales for Dunkin' Donuts U.S. company-owned restaurants are now included in the Dunkin' Donuts U.S. segment revenues. Prior to fiscal year 2012, retail sales for Dunkin' Donuts U.S. company-owned restaurants were excluded from segment revenues. Additionally, revenue and segment profit for Baskin-Robbins' sales to United States military locations located internationally were previously included in the Baskin-Robbins International segment, but are now included within the Baskin-Robbins U.S. segment. Revenues for Dunkin' Donuts U.S. and revenues and segment profit for Baskin-Robbins U.S. and Baskin-Robbins International in the tables below have been restated to reflect these changes for all periods presented. There was no impact to Dunkin' Donuts U.S. segment profit as the net operating income earned from company-owned restaurants was previously included in segment profit.

Revenues for all operating segments include only transactions with unaffiliated customers and include no intersegment revenues. Revenues reported as "Other" include revenue earned through arrangements with third parties in which our brand names are used and revenue generated from online training programs for franchisees that are not allocated to a specific segment. Revenues by segment were as follows (in thousands):

| | Revenues | |
|-----------------------------------|---------------------------|---------------------------|

Equity in net income of joint ventures is included in segment profit for the Dunkin' Donuts International and Baskin-Robbins International reportable segments. Income included in "Other" in the segment profit table below represents the reduction of depreciation and amortization expense reported by BR Korea Co., Ltd. ("BR Korea") as the Company recorded an impairment charge in fiscal year 2011 related to the underlying goodwill, intangible assets, and long-lived assets of BR Korea. Equity in net income of joint ventures by reportable segment was as follows (in thousands):

| | Three months ended | |
|--|--------------------|-------------------|
| | March 31, 2012 | March 26, 2011 |
| Dunkin' Donuts International | \$ 873 | 388 |

(8) Stockholders' Equity

(a) Public Offerings

On April 4, 2012, certain existing stockholders sold 26,400,000 shares of our common stock at a price of \$29.50 per share, less underwriting discounts and commissions, in a secondary public offering. Additionally, the underwriters exercised their option to purchase an additional 3,960,000 shares, which were also sold by certain existing stockholders. The Company did not receive any proceeds from the sales of shares by the existing stockholders. The Company incurred approximately \$914 thousand of expenses in connection with the offering during the three months ended March 31, 2012.

(b) Equity Incentive Plans

The Company's 2006 Executive Incentive Plan, as amended, (the "2006 Plan") provides for the grant of stock-based and other incentive awards. A maximum of 12,191,145 shares of common stock may be delivered in satisfaction of awards under the 2006 Plan, of which a maximum of 5,012,966 shares may be awarded as nonvested (restricted) shares and a maximum of 7,178,179 may be delivered in satisfaction of stock options.

The Dunkin' Brands Group, Inc. 2011 Omnibus Long-Term Incentive Plan (the "2011 Plan") was adopted in July 2011, and is the only plan under which the Company currently grants awards. A maximum of 7,000,000 shares of common stock may be delivered in satisfaction of awards under the 2011 Plan.

During the three months ended March 31, 2012, the Company granted options to purchase 365,200 shares of common stock and 8,500 restricted stock units to employees under the 2011 Plan. The stock options vest in equal annual amounts over a four-year period subsequent to the grant date, and have a maximum contractual term of ten years. The restricted stock units vest in equal annual amounts over a three-year period subsequent to the grant date.

Total compensation expense related to all share-based awards was \$628 thousand and \$241 thousand for the three months ended March 31, 2012 and March 26, 2011, respectively, and is included in general and administrative expenses, net in the consolidated statements of operations.

(c) Accumulated Other Comprehensive Income

The components of accumulated other comprehensive income were as follows (in thousands):

| | March 31, 2012 | December 31, 2011 |
|--|-------------------|----------------------|
| Effect of foreign currency translation | \$ 16,374 | 20,910 |
| Other | (2,745) | (1,309) |
| Total accumulated other comprehensive income | \$ 13,629 | 19,601 |

(d) Dividends

On March 6, 2012, DBGI's board of directors approved the initiation of a cash dividend to shareholders. The quarterly dividend of \$0.15 per share of common stock, or a total of approximately \$18.0 million, was paid on March 28, 2012. On April 26, 2012, DBGI's board of directors approved the next quarterly dividend of \$0.15 per share of common stock, payable May 16, 2012.

(9) Earnings per Share

The computation of basic and diluted earnings per common share is as follows (in thousands, except share and per share amounts):

| | Three months ended | |
|---|--------------------|-------------------|
| | March 31, 2012 | March 26, 2011 |
| Net income (loss) attributable to Dunkin' Brands—basic and diluted | \$ 25,950 | (1,723) |
| Allocation of net income (loss) to common shareholders ⁽¹⁾ : | | |
| Class L—basic and diluted | n/a | 19,331 |
| Common—basic ⁽²⁾ | 25,867 | (21,054) |
| Common—diluted ⁽²⁾ | 25,887 | (21,054) |
| Weighted average number of common shares: | | |
| Class L—basic and diluted | n/a | 22,817,115 |
| Common—basic | 119,682,197 | 41,370,341 |
| Common—diluted | 121,316,180 | 41,370,341 |
| Earnings (loss) per common share: | | |
| Class L—basic and diluted | n/a | 0.85 |
| Common—basic | \$ 0.22 | (0.51) |
| Common—diluted | 0.21 | (0.51) |

- (1) As the Company had both Class L and common stock outstanding during the three months ended March 26, 2011 and Class L had preference with respect to all distributions, earnings per share is calculated using the two-class method, which requires the allocation of earnings to each class of common stock. The numerator in calculating Class L basic and diluted earnings per share is the Class L preference amount accrued at 9% per annum during the three months ended March 26, 2011.
- (2) Net income allocated to common shareholders for the three months ended March 31, 2012 excludes \$83 thousand and \$63 thousand for basic and diluted earnings per share, respectively, that is allocated to participating securities. Participating securities consist of unvested (restricted) shares that contain a nonforfeitable right to participate in dividends. No net loss was allocated to participating securities for the three months ended March 26, 2011 as the participating securities do not participate in losses.

The weighted average number of common shares in the common diluted earnings per share calculation for the three months ended March 26, 2011 excludes all restricted stock and stock options outstanding, as they would be antidilutive. The weighted average number of common shares in the common diluted earnings per share calculation for all periods excludes all performance-based restricted stock and stock options outstanding for which the performance criteria were not yet met as of the fiscal period end. As of March 31, 2012, there were approximately 194,000 common restricted stock awards and approximately 2,297,000 options to purchase common stock that were performance-based and for which the performance criteria were not yet met. There were no Class L common stock equivalents outstanding during the three months ended March 26, 2011.

(10) Income Taxes

During the three months ended March 26, 2011, the Company recognized deferred tax expense of \$1.9 million due to enacted changes in future state income tax rates. This change in enacted tax rates affects the tax rate expected to be in effect in future periods when the deferred tax assets and liabilities reverse. Additionally, the Company recorded a tax benefit during the three months ended March 31, 2012 related to the reversal of approximately \$2.0 million of reserves for uncertain tax positions for which settlement with the taxing authorities was reached during the period.

The federal income tax returns of the Company for fiscal years 2006, 2007, 2008, and 2009 are currently under audit by the IRS, and the IRS has proposed adjustments for fiscal years 2006 and 2007 to increase our taxable income as it relates to our gift card program, specifically to record taxable income upon the activation of gift cards. We have filed a protest to the IRS' proposed adjustments. If the IRS were to prevail in this matter the proposed adjustments would result in additional taxable income of approximately \$58.9 million for fiscal years 2006 and 2007 and approximately \$27.0 million of additional federal and state taxes and interest owed, net of federal and state benefits. If the IRS prevails, a cash payment would be required and the additional taxable income would represent temporary differences that will be deductible in future years. Therefore, the potential tax expense attributable to the IRS adjustments for 2006 and 2007 would be limited to \$3.4 million, consisting of federal and state interest, net of federal and state benefits. In addition, if the IRS were to prevail in respect of fiscal years 2006 and 2007, it is likely to make similar claims for years subsequent to fiscal 2007 and the potential additional federal and state taxes and interest owed, net of federal and state benefits, for fiscal years 2008, 2009, and 2010, computed on a similar basis to the IRS method used for fiscal years 2006 and 2007, and factoring in the timing of our gift card uses and activations, would be approximately \$19.8 million. The corresponding potential tax expense impact attributable to these later fiscal years, 2008 through 2010, would be approximately \$0.9 million. During the fourth quarter of 2011, representatives of the Company met with the IRS appeals officer. Based on that meeting, the Company proposed a settlement related to this issue and is awaiting a response from the IRS. If our settlement proposal is accepted as presented, we expect to make a cash tax payment in an amount that is less than the amounts proposed by the IRS to cumulatively adjust our tax method of accounting for our gift card

[Table of Contents](#)

program through the tax year ended December 25, 2010. No assurance can be made that a settlement can be reached, or that we will otherwise prevail in the final resolution of this matter. An unfavorable outcome from any tax audit could result in higher tax costs, penalties, and interests, thereby negatively and adversely impacting our financial condition, results of operations, or cash flows.

(11) Commitments and Contingencies

(a) Lease Commitments

The Company is party to various leases for property, including land and buildings, leased automobiles, and office equipment under non-cancelable operating and capital lease arrangements.

(b) Guarantees

The Company has established agreements with certain financial institutions whereby the Company's franchisees can obtain financing with terms of approximately three to ten years for various business purposes. Substantially all loan proceeds are used by the franchisees to finance store improvements, new store development, new central production locations, equipment purchases, related business acquisition costs, working capital, and other costs. In limited instances, the Company guarantees a portion of the payments and commitments of the franchisees, which is collateralized by the store equipment owned by the franchisee. Under the terms of the agreements, in the event that all outstanding borrowings come due simultaneously, the Company would be contingently liable for \$7.0 million and \$6.9 million at March 31, 2012 and December 31, 2011, respectively. At March 31, 2012 and December 31, 2011, there were no amounts under such guarantees that were due. The fair value of the guarantee liability and corresponding asset recorded on the consolidated balance sheets was \$820 thousand and \$902 thousand, respectively, at March 31, 2012 and \$754 thousand and \$874 thousand, respectively, at December 31, 2011. The Company assesses the risk of performing under these guarantees for each franchisee relationship on a quarterly basis. As of March 31, 2012 and December 31, 2011, the Company had recorded reserves for such guarantees of \$557 thousand and \$390 thousand, respectively.

The Company has entered into a third-party guarantee with a distribution facility of franchisee products that ensures franchisees will purchase a certain volume of product over a ten-year period. As product is purchased by the Company's franchisees over the term of the agreement, the amount of the guarantee is reduced. As of March 31, 2012 and December 31, 2011, the Company was contingently liable for \$7.6 million and \$7.8 million, respectively, under this guarantee. Based on current internal forecasts, the Company believes the franchisees will achieve the required volume of purchases, and therefore, the Company would not be required to make payments under this agreement. The Company has also entered into a third-party guarantee with this distribution facility that ensures franchisees will sell a certain volume of product each year over a four-year period. As of March 31, 2012, the Company was contingently liable for \$7.5 million under this guarantee. Based on current internal forecasts, the Company believes the franchisees will achieve the required volume of sales, and therefore, the Company would not be required to make payments under this agreement. Additionally, the Company has various supply chain contracts that provide for purchase commitments or exclusivity, the majority of which result in the Company being contingently liable upon early termination of the agreement or engaging with another supplier. Based on prior history and the Company's ability to extend contract terms, we have not recorded any liabilities related to these commitments. As of March 31, 2012, we were contingently liable under such supply chain agreements for approximately \$22.3 million.

As a result of assigning our interest in obligations under property leases as a condition of the franchising of certain restaurants and the guarantee of certain other leases, we are contingently liable on certain lease agreements. These leases have varying terms, the latest of which expires in 2026. As of March 31, 2012 and December 31, 2011, the potential amount of undiscounted payments the Company could be required to make in the event of nonpayment by the primary lessee was \$8.1 million and \$10.5 million, respectively. Our franchisees are the primary lessees under the majority of these leases. The Company generally has cross-default provisions with these franchisees that would put them in default of their franchise agreement in the event of nonpayment under the lease. We believe these cross-default provisions significantly reduce the risk that we will be required to make payments under these leases. Accordingly, we do not believe it is probable that the Company will be required to make payments under such leases, and we have not recorded a liability for such contingent liabilities.

(c) Letters of Credit

At March 31, 2012 and December 31, 2011, the Company had standby letters of credit outstanding for a total of \$11.2 million. There were no amounts drawn down on these letters of credit.

(d) Legal Matters

The Company is engaged in several matters of litigation arising in the ordinary course of its business as a franchisor. Such matters include disputes related to compliance with the terms of franchise and development agreements, including claims or threats of claims of breach of contract, negligence, and other alleged violations by the Company. At March 31, 2012 and December 31, 2011, contingent liabilities totaling \$4.7 million were included in other current liabilities in the consolidated balance sheets to reflect the Company's estimate of the potential loss which may be incurred in connection with these matters. While the Company intends to vigorously defend its positions against all claims in these lawsuits and disputes, it is reasonably possible that the losses in connection with these matters could increase by up to an additional \$6.0 million based on the outcome of ongoing litigation or negotiations.

(12) Related-Party Transactions**(a) Advertising Funds**

At March 31, 2012 and December 31, 2011, the Company had a net payable of \$20.3 million and \$19.5 million, respectively, to the various advertising funds.

To cover administrative expenses of the advertising funds, the Company charges each advertising fund a management fee for items such as facilities, accounting services, information technology, data processing, product development, legal, administrative support services, and other operating expenses, which amounted to \$1.4 million and \$1.5 million for the three months ended March 31, 2012 and March 26, 2011, respectively. Such management fees are reflected in the consolidated statements of operations as a reduction in general and administrative expenses, net.

(b) Sponsors

At March 31, 2012, DBGI was majority-owned by investment funds affiliated with Bain Capital Partners, LLC, The Carlyle Group, and Thomas H. Lee Partners, L.P. (collectively, the "Sponsors").

On April 4, 2012, certain existing stockholders, including the Sponsors, sold a total of 30,360,000 shares of our common stock (see note 8(a)). Subsequent to this sale of shares, each of the Sponsors owned approximately 10% of our outstanding common stock and each Sponsor continues to have two representatives on the board of directors.

Prior to the closing of the Company's initial public offering on August 1, 2011, the Company was charged an annual management fee by the Sponsors of \$1.0 million per Sponsor, payable in quarterly installments. The Company recognized \$750 thousand of expense related to Sponsor management fees during the three months ended March 26, 2011, which is included in general and administrative expenses, net in the consolidated statements of operations.

At March 31, 2012 and December 31, 2011, certain affiliates of the Sponsors held \$56.6 million and \$64.8 million, respectively, of term loans, net of original issue discount, issued under the Company's senior credit facility. The terms of these loans are identical to all other term loans issued to lenders in the senior credit facility.

Our Sponsors have a substantial interest in our Company as well as several other entities. The existence of such common ownership and management control could result in differences within our operating results or financial position than if the entities were autonomous. The Company made payments to entities under common control totaling approximately \$202 thousand and \$65 thousand during the three months ended March 31, 2012 and March 26, 2011, respectively, primarily for the purchase of training services and leasing of restaurant space. At March 31, 2012 and December 31, 2011, the Company had a net receivable of \$20 thousand and a payable of \$127 thousand, respectively, which were recorded in accounts receivable, net and accounts payable and other current liabilities in the consolidated balance sheets.

We have entered into an investor agreement with the Sponsors and also entered into a registration rights and a coordination agreement with certain shareholders, including the Sponsors. Pursuant to these agreements, subject to certain exceptions and conditions, our Sponsors may require us to register their shares of common stock under the Securities Act, and they will have the right to participate in certain future registrations of securities by us.

(c) Joint Ventures

The Company received royalties from its joint ventures as follows (in thousands):

| | Three months ended | |
|--|--------------------|-------------------|
| | March 31, 2012 | March 26, 2011 |
| B-R 31 Ice Cream Co., Ltd ("BR Japan") | \$ 530 | 348 |
| BR Korea Co., Ltd. ("BR Korea") | 840 | 869 |
| | <u>\$ 1,370</u> | <u>1,217</u> |

At March 31, 2012 and December 31, 2011, the Company had \$895 thousand and \$1.0 million, respectively, of royalties receivable from its joint ventures which were recorded in accounts receivable, net of allowance for doubtful accounts, in the consolidated balance sheets.

[Table of Contents](#)

The Company made net payments to its joint ventures totaling approximately \$344 thousand and \$109 thousand during the three months ended March 31, 2012 and March 26, 2011, respectively, primarily for the purchase of ice cream products and incentive payments.

(d) Board of Directors

Certain family members of one of our directors hold an ownership interest in an entity that owns and operates Dunkin' Donuts restaurants and holds the right to develop additional restaurants under store development agreements. During the three months ended March 31, 2012, the Company received \$293 thousand in royalty, rental, and other payments from this entity. No amounts were received during the three months ended March 26, 2011.

Forward-Looking Statements

Certain statements contained herein are not based on historical fact and are "forward-looking statements" within the meaning of the applicable securities laws and regulations. Generally, these statements can be identified by the use of words such as "anticipate," "believe," "could," "estimate," "expect," "feel," "forecast," "intend," "may," "plan," "potential," "project," "should," "would," and similar expressions intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. These forward-looking statements include all matters that are not historical facts. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These risk and uncertainties include, but are not limited to: the ongoing level of profitability of franchisees and licensees; changes in working relationship with our franchisees and licensees and the actions of our franchisees and licensees; our master franchisees' relationships with sub-franchisees; the strength of our brand in the markets in which we compete; changes in competition within the quick service restaurant segment of the food industry; changes in consumer behavior resulting from changes in technologies or alternative methods of delivery; economic and political conditions in the countries where we operate; our substantial indebtedness; our ability to protect our intellectual property rights; consumer preferences, spending patterns and demographic trends; the success of our growth strategy and international development; changes in commodity and food prices, particularly coffee, dairy products and sugar, and the other operating costs; shortages of coffee; failure of our network and information technology systems; interruptions or shortages in the supply of products to our franchisees and licensees; the impact of food borne-illness or food safety issues or adverse public or media opinions regarding the health effects of consuming our products; our ability to collect royalty payments from our franchisees and licensees; the ability of our franchisees and licensees to open new restaurants and keep existing restaurants in operation; our ability to retain key personnel; any inability to protect consumer credit card data and catastrophic events.

Forward-looking statements reflect management's analysis as of the date of this quarterly report. Important factors that could cause actual results to differ materially from our expectations are more fully described in our other filings with the Securities and Exchange Commission, including under the section headed "Risk Factors" in our most recent annual report on Form 10-K. Except as required by applicable law, we do not undertake to publicly update or revise any of these forward-looking statements, whether as a result of new information, future events or otherwise.

Introduction and Overview

We are one of the world's leading franchisors of quick service restaurants ("QSRs") serving hot and cold coffee and baked goods, as well as hard serve ice cream. We franchise restaurants under our Dunkin' Donuts and Baskin-Robbins brands. With over 16,800 points of distribution in 58 countries, we believe that our portfolio has strong brand awareness in our key markets. QSR is a restaurant format characterized by counter or drive-thru ordering and limited or no table service. As of March 31, 2012, Dunkin' Donuts had 10,121 global points of distribution with restaurants in 36 U.S. states and the District of Columbia and in 31 foreign countries. Baskin-Robbins had 6,755 global points of distribution as of the same date, with restaurants in 44 U.S. states and the District of Columbia and in 48 foreign countries.

We are organized into four reporting segments: Dunkin' Donuts U.S., Dunkin' Donuts International, Baskin-Robbins U.S., and Baskin-Robbins International. We generate revenue from four primary sources: (i) royalty income and franchise fees associated with franchised restaurants, (ii) rental income from restaurant properties that we lease or sublease to franchisees, (iii) sales of ice cream products to franchisees in certain international markets, and (iv) other income including fees for the licensing of our brands for products sold in non-franchised outlets, the licensing of the right to manufacture Baskin-Robbins ice cream sold to U.S. franchisees, refranchising gains, transfer fees from franchisees, revenue from our company-owned restaurants, and online training fees.

Franchisees fund the vast majority of the cost of new restaurant development. As a result, we are able to grow our system with lower capital requirements than many of our competitors. With only 33 company-owned points of distribution as of March 31, 2012, we are less affected by store-level costs and profitability and fluctuations in commodity costs than other QSR operators.

Our franchisees fund substantially all of the advertising that supports both brands. Those advertising funds also fund the cost of our marketing personnel. Royalty payments and advertising fund contributions typically are made on a weekly basis for restaurants in the U.S., which limits our working capital needs. For the three months ended March 31, 2012, franchisee contributions to the U.S. advertising funds were \$76.9 million.

We operate and report financial information on a 52- or 53-week year on a 13-week quarter (or 14-week fourth quarter, when applicable) basis with the fiscal year ending on the last Saturday in December and fiscal quarters ending on the 13th Saturday of each quarter (or 14th Saturday of the fourth quarter, when applicable). The data periods contained within the three-month periods ended March 31, 2012 and March 26, 2011 reflect the results of operations for the 13-week periods ended on those dates. Operating results for the three-month period ended March 31, 2012 are not necessarily indicative of the results that may be expected for the fiscal year ending December 29, 2012.

(1) Comparable store sales growth data was not available for our international segments until fiscal year 2012.

Our financial results are largely driven by changes in systemwide sales, which include sales by all points of distribution, whether owned by Dunkin' Brands or by its franchisees and licensees. While we do not record sales by franchisees or licensees as revenue, we believe that this information is important in obtaining an understanding of our financial performance. We believe systemwide sales growth and franchisee-reported sales information aid in understanding how we derive royalty revenue, assists readers in evaluating our performance relative to competitors, and indicates the strength of our franchised brands. Comparable store sales growth represents the growth in average weekly sales for restaurants that have been open at least 54 weeks that have reported sales in the current and comparable prior year week.

Overall growth in systemwide sales of 10.9% for the three months ended March 31, 2012 resulted from the following:

- Dunkin' Donuts U.S. systemwide sales growth of 11.5% as a result of 261 net new restaurants opened since March 26, 2011 and comparable store sales growth of 7.2% driven by a combination of an increase in both transactions and average ticket. Increases in transactions and average ticket resulted from strong beverage sales growth, especially in cold beverages, differentiated breakfast and afternoon sandwich offerings, sales of K-Cup portion packs, and a focused marketing campaign.
- Dunkin' Donuts International systemwide sales growth of 4.8% driven by increased sales in the Middle East and Southeast Asia.
- Baskin-Robbins International systemwide sales growth of 11.6% primarily as a result of increased sales in South Korea and Japan.
- Baskin-Robbins U.S. systemwide sales growth of 10.8% resulted primarily from comparable store sales growth of 9.4% driven by capitalizing on favorably warm weather, product news and innovation, the launch of a new advertising campaign, and improved operational execution.

The increase in total revenues of approximately \$13.2 million, or 9.5%, for the three months ended March 31, 2012 as compared to the comparable period of 2011 primarily resulted from increased franchise fees and royalty income of \$10.1 million and a \$2.3 million increase in other revenues resulting from additional company-owned restaurants.

Operating income for the three months ended March 31, 2012 increased \$10.4 million, or 23.1%, from the comparable period of the prior year. This increase resulted primarily from the \$13.2 million increase in total revenues and a \$2.7 million increase in equity in net income from joint ventures, offset by a \$4.0 million increase in general and administrative expenses driven by additional investments in personnel and a \$1.7 million decrease in net margin on ice cream products.

Adjusted operating income increased \$10.4 million, or 19.8%, for the three months ended March 31, 2012 primarily as a result of the \$13.2 million increase in total revenues and a \$2.7 million increase in equity in net income from joint ventures. These increases in adjusted operating income were offset by an increase in general and administrative expenses of \$3.0 million driven by additional investments in personnel and a \$1.7 million decrease in net margin on ice cream products.

Net income increased \$27.7 million for the three months ended March 31, 2012 resulting from a \$17.2 million decrease in interest expense, an \$11.0 million decrease in loss on debt extinguishment and refinancing transactions due to costs recorded in the prior year resulting from the upsizing and repricing of long-term debt, and the \$10.4 million increase in operating income. These increases in net income were offset by a \$10.5 million increase in income tax expense resulting from the increased income before income taxes.

Adjusted net income increased \$21.1 million for the three months ended March 31, 2012 primarily as a result of a \$17.2 million decrease in interest expense and a \$10.4 million increase in adjusted operating income, offset by a \$6.1 million increase in income tax expense.

Adjusted operating income and adjusted net income are non-GAAP measures reflecting operating income and net income adjusted for amortization of intangible assets, impairment charges, and other non-recurring charges, net of the tax impact of such adjustments in the case of adjusted net income. The Company uses adjusted operating income and adjusted net income as key performance measures for the purpose of evaluating performance internally. We also believe adjusted operating income and adjusted net income provide our investors with useful information regarding our historical operating results. These non-GAAP measurements are not intended to replace the presentation of our financial results in accordance with GAAP. Use of the terms adjusted operating income and adjusted net income may differ from similar measures reported by other companies. Adjusted operating income and adjusted net income are reconciled from operating income and net income determined under GAAP as follows:

| | Three months ended | |

[Table of Contents](#)

On August 1, 2011, the Company completed an initial public offering in which 22,250,000 shares of common stock were sold at an initial public offering price of \$19.00 per share. Immediately prior to the offering, each share of the Company's Class L common stock converted into 2.4338 shares of common stock. The number of common shares used in the calculation of diluted adjusted earnings per pro forma common share for the three months ended March 26, 2011 gives effect to the conversion of all outstanding shares of Class L common stock at the conversion factor of 2.4338 common shares for each Class L share, as if the conversion was completed at the beginning of that fiscal period. The calculation of diluted adjusted earnings per pro forma common share also includes the dilutive effect of common restricted shares and stock options, using the treasury stock method. No pro forma adjustments have been made to the number of common shares used in the calculation of diluted adjusted earnings per pro forma common share for the three months ended March 31, 2012, as all Class L common stock had converted to common shares prior to the beginning of that fiscal period. Diluted adjusted earnings per pro forma common share is calculated using adjusted net income, as defined above.

Diluted adjusted earnings per pro forma common share is not a presentation made in accordance with GAAP, and our use of the term diluted adjusted earnings per pro forma common share may vary from similar measures reported by others in our industry due to the potential differences in the method of calculation. Diluted adjusted earnings per pro forma common share should not be considered as an alternative to earnings (loss) per share derived in accordance with GAAP. Diluted adjusted earnings per pro forma common share has important limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. Because of these limitations, we rely primarily on our GAAP results. However, we believe that presenting diluted adjusted earnings per pro forma common share is appropriate to provide additional information to investors to compare our performance prior to and after the completion of our initial public offering and related conversion of Class L shares into common, as well as to provide investors with useful information regarding our historical operating results. The following table sets forth the computation of diluted adjusted earnings per pro forma common share:

Total revenues for the three months ended March 31, 2012 increased \$13.2 million, or 9.5%, driven by an increase in royalty income of \$9.8 million, or 12.3%, mainly as a result of Dunkin' Donuts U.S. systemwide sales growth. Other revenues also contributed \$2.3 million to the overall increase in revenues, driven by an increase in sales at company-owned restaurants due to the acquisition of restaurants since the prior year.

| Operating income | <u>\$ 55,195</u> | <u>44,836</u> | <u>10,359</u> | <u>23.1%</u> |

Occupancy expenses for franchised restaurants for the three months ended March 31, 2012 increased \$0.6 million, or 5.1%, from the prior year primarily due to higher sales at locations with sales-based rent and changes in lease reserves recorded for closed locations. Net margin on ice cream products for the three months ended March 31, 2012 declined \$1.7 million primarily as a result of a decrease in volume to the Middle East.

General and administrative expenses increased \$4.0 million, or 7.3%, for the three months ended March 31, 2012, primarily driven by a \$4.4 million increase in personnel costs related to continued investments in our Dunkin' Donuts U.S. contiguous growth strategy and higher projected incentive compensation payouts. Also contributing to the increase in general and administrative expenses was \$2.3 million of additional company-owned restaurant costs due to the acquisition of restaurants since the prior year, as well as \$0.9 million of transaction costs incurred related to the Company's secondary offering that closed in early April 2012. Offsetting these increases was a decline of \$3.2 million in professional, information technology, and legal expenses. As a result of the secondary offering closing in April 2012, the Company expects to record incremental share-based compensation expense within general and administrative expenses of approximately \$1.3 million during the three months ended June 30, 2012, related to approximately 1.0 million stock options granted to employees that were not eligible to vest until the sale or disposition of the shares held by our Sponsors that were sold in the secondary offering (performance condition).

Depreciation and amortization for the three months ended March 31, 2012 remained consistent with the prior year, decreasing only 1.2%, or \$0.2 million, primarily as a result of assets becoming fully depreciated.

The decrease in impairment charges for the three months ended March 31, 2012 resulted from the timing of lease terminations in the ordinary course, which results in the write-off of favorable lease intangible assets and leasehold improvements.

Equity in net income of joint ventures increased \$2.7 million for the three months ended March 31, 2012 driven by strong performance in our South Korea and Japan joint ventures' Baskin-Robbins businesses. The Japan joint venture was also negatively impacted in the prior year by the March 2011 earthquake and tsunami.

| | Three months ended | | Increase (Decrease) | |

| Total other expense | <u>\$ 16,518</u> | <u>44,298</u> | <u>(27,780)</u> | <u>(62.7)%</u> |

The decrease in net interest expense for the three months ended March 31, 2012 resulted primarily from the repayment of higher-rate senior notes with proceeds from term loan upsizing transactions in February and May 2011 and the Company's initial public offering completed in August 2011. Additionally, the Company further reduced interest expense by re-pricing its outstanding term loans in conjunction with the February and May 2011 upsized transactions.

The loss on debt extinguishment and refinancing transactions for the three months ended March 26, 2011 resulted from the term loan upsizing and re-pricing transaction and related repayment of \$150.0 million of senior notes completed in the first quarter of 2011. As a result of these transactions, the Company recognized losses of \$4.4 million related to the term loans and \$6.6 million related to the senior notes, of which a total of \$6.3 million represented write-offs of unamortized debt issuance costs and original issue discounts.

The decline in other gains, net, for the three months ended March 31, 2012 resulted primarily from reduced foreign exchange gains due to unfavorable fluctuations in the U.S. dollar against the Canadian dollar as compared to the corresponding periods in the prior year.

| Provision for income taxes | 12,763 | 2,261 |
| Effective tax rate | 33.0% | 420.3% |

The effective tax rate for the three months ended March 31, 2012 was favorably impacted by the reversal of approximately \$2.0 million of reserves for uncertain tax positions for which settlement with the taxing authorities was reached during the quarter. The higher effective tax rate of 420.3% for the three months ended March 26, 2011 was primarily attributable to enacted increases in state tax rates, which resulted in additional deferred tax expense of approximately \$1.9 million in the prior year. The effective tax rate for the three months ended March 26, 2011 was also impacted by a reduced income before income taxes, driven by the loss on debt extinguishment and refinancing transaction, which magnified the impact of permanent and other tax differences.

Operating segments

We operate four reportable operating segments: Dunkin' Donuts U.S., Dunkin' Donuts International, Baskin-Robbins U.S., and Baskin-Robbins International. We evaluate the performance of our segments and allocate resources to them based on earnings before interest, taxes, depreciation, amortization, impairment charges, foreign currency gains and losses, other gains and losses, and unallocated corporate charges, referred to as segment profit. Segment profit for the Dunkin' Donuts International and Baskin-Robbins International segments include equity in net income from joint ventures. For reconciliations to total revenues and income before income taxes, see the notes to our consolidated financial statements. Revenues for all segments include only transactions with unaffiliated customers and include no intersegment revenues. Revenues not included in segment revenues include revenue earned through arrangements with third parties in which our brand names are used and revenue generated from online training programs for franchisees that are not allocated to a specific segment.

Subsequent to December 31, 2011 and as part of fiscal year 2012 management reporting, retail sales for Dunkin' Donuts U.S. company-owned restaurants are now included in the Dunkin' Donuts U.S. segment revenues. Prior to fiscal year 2012, retail sales for Dunkin' Donuts U.S. company-owned restaurants were excluded from segment revenues.

[Table of Contents](#)

Additionally, revenue and segment profit for Baskin-Robbins' sales to United States military locations located internationally were previously included in the Baskin-Robbins International segment, but are now included within the Baskin-Robbins U.S. segment. Revenues for Dunkin' Donuts U.S. and revenues and segment profit for Baskin-Robbins U.S. and Baskin-Robbins International in the tables below have been restated to reflect these changes for all periods presented. There was no impact to Dunkin' Donuts U.S. segment profit as the net operating income earned from company-owned restaurants was previously included in segment profit.

| Segment profit | \$ 79,941 | 70,707 | 9,234 | 13.1% |

The increase in Dunkin' Donuts U.S. revenues for the three months ended March 31, 2012 was primarily driven by an increase in royalty income of \$8.5 million as a result of an increase in systemwide sales, as well as an increase in other revenues of \$2.0 million driven by incremental sales from acquisitions of company-owned restaurants. Also contributing to the increase in Dunkin' Donuts U.S. revenues was a \$1.0 million increase in rental income due to higher sales at locations with sales-based rent, as well as a \$1.0 million increase in franchise fees due to increased franchise renewal income.

The increase in Dunkin' Donuts U.S. segment profit for the three months ended March 31, 2012 was driven by the increase in total revenues of \$12.5 million. Offsetting the increase in revenues was an increase of \$2.1 million in personnel costs and travel related to investment in our Dunkin' Donuts U.S. contiguous growth strategy and higher projected incentive compensation payouts. Also offsetting the increase in revenues was a \$0.7 million increase in professional fees, legal, and other general and administrative costs primarily due to incremental costs of sales related to company-owned restaurants acquired, as well as a \$0.6 million increase in occupancy expenses driven by higher sales at locations with sales-based rent and changes in lease reserves recorded for closed locations.

| Segment profit | \$ 3,161 | 3,181 | (20) | (0.6)% |

The slight increase in Dunkin' Donuts International revenue for the three months ended March 31, 2012 resulted primarily from an increase in royalty income of \$0.4 million driven by the increase in systemwide sales, as well as an increase in other revenues of \$0.2 million due to fees collected from a licensee upon transfer of a territory. Offsetting these increases in revenue was a decrease of \$0.4 million in franchise fees as the prior year included a deposit retained from a former licensee in Mexico.

Segment profit for Dunkin' Donuts International for the three months ended March 31, 2012 remained consistent with the prior year as an increase in income from the South Korea joint venture of \$0.5 million was offset by a \$0.2 million increase in personnel costs and travel and a \$0.3 million increase in professional, legal, and other general and administrative costs.

The increase in Baskin-Robbins U.S. revenues for the three months ended March 31, 2012 primarily resulted from an increase in royalty income of \$0.7 million driven by the increase in systemwide sales, offset by a decrease of \$0.2 million in franchise fees and a decrease of \$0.2 million in rental income due to a reduction in the number of leased locations.

Baskin-Robbins U.S. segment profit for the three months ended March 31, 2012 increased \$1.0 million primarily as a result of the increase in total revenues of \$0.4 million. Also contributing to the increase in segment profit was a \$0.6 million decrease in other general and administrative expenses resulting from costs incurred in the prior year related to the roll-out of a new point-of-sale system for Baskin-Robbins franchisees, offset by additional contributions to the Baskin-Robbins advertising fund to support brand-building advertising.

Baskin-Robbins International total revenues for the three months ended March 31, 2012 remained consistent with the prior year, with the increase in royalty income of \$0.2 million being offset by declines in franchise fees and other revenues.

Baskin-Robbins International segment profit decreased \$0.7 million for the three months ended March 31, 2012 primarily due to a \$1.8 million decline in net margin on ice cream sales driven by a decrease in volume to the Middle East. Also contributing to the decline in segment profit was a \$0.2 million increase in personnel and travel costs. Offsetting these declines in segment profit was an increase in joint venture income of \$1.4 million resulting from strong performance in our South Korea joint venture's Baskin-Robbins business, as well as increased income from the Japan joint venture as the prior year reflects a negative impact of the March 2011 earthquake and tsunami on our Japan joint venture's results.

Liquidity and Capital Resources

As of March 31, 2012, we held \$206.0 million of cash and cash equivalents, which included \$86.7 million of cash held for advertising funds and reserved for gift card/certificate programs. In addition, as of March 31, 2012, we had a borrowing capacity of \$88.8 million under our \$100.0 million revolving credit facility. During the three months ended March 31, 2012, net cash used in operating activities was \$12.4 million, as compared to net cash provided by operating activities of \$3.6 million for the three months ended March 26, 2011. Net cash provided by operating activities for the three months ended March 31, 2012 includes a decrease of \$36.4 million in cash held for advertising funds and reserved for gift card/certificate programs, which was primarily driven by seasonality of our gift card program. Excluding cash held for advertising funds and reserved for gift card/certificate programs, we generated \$19.7 million of free cash flow during the three months ended March 31, 2012, calculated as follows (in thousands):

| | <u>Three months ended</u> <u>March 31, 2012</u> |
|---|--|
| Net cash used in operating activities | \$ (12,438) |
| Plus: Decrease in cash held for advertising funds and reserved for gift card/certificate programs | 36,433 |
| Less: Additions to property and equipment | (4,279) |
| Free cash flow | <u>\$ 19,716</u> |

Net cash used in operating activities of \$12.4 million during the three months ended March 31, 2012 was primarily driven by net income of \$25.9 million, increased by depreciation and amortization of \$13.1 million, and dividends received from joint ventures of \$4.4 million, offset by \$49.6 million of changes in operating assets and liabilities and \$6.2 million of other net non-cash reconciling adjustments. The \$49.6 million of changes in operating assets and liabilities was primarily driven by the seasonality of our gift card program. During the three months ended March 31, 2012, we invested \$4.3 million in capital additions to property and equipment. Net cash used in financing activities was \$23.5 million during the three months ended March 31, 2012, driven primarily by a dividend payment of \$18.0 million and \$6.4 million in repayments of long-term debt. In March 2012, the Company announced the initiation of a regular cash dividend to shareholders, paying the first quarterly dividend of \$0.15 per share on March 28, 2012.

The senior credit facility is guaranteed by certain of Dunkin' Brands, Inc.'s wholly-owned domestic subsidiaries and includes a term loan facility and a revolving credit facility. The aggregate borrowings available under the senior secured credit facility are approximately \$1.6 billion, consisting of a full-drawn approximately \$1.5 billion term loan facility and an undrawn \$100.0 million revolving credit facility under which there was \$88.8 million in available borrowings and \$11.2 million of letters of credit outstanding as of March 31, 2012. The senior credit facility requires principal amortization repayments to be made on term loan borrowings equal to approximately \$15.0 million per calendar year, payable in quarterly installments through September 2017. The final scheduled principal payment on the outstanding borrowings under the term loan is due in November 2017. Additionally, following the end of each fiscal year, if our leverage ratio, which is a measure of our cash income to outstanding debt, exceeds 4.00x, we are required to prepay an amount equal to 25% of excess cash flow (as defined in the senior credit facility) for such fiscal year. Under the terms of the senior credit facility, the first excess cash flow payment was due in the first quarter of fiscal year 2012 based on fiscal year 2011 excess cash flow and leverage ratio. In December 2011, the Company made an additional principal payment of \$11.8 million that was applied to the 2011 excess cash flow payment due in the first quarter of 2012. Based on fiscal year 2011 excess cash flow, considering all payments made, the excess cash flow payment required in the first quarter of 2012 was \$2.4 million. The excess cash flow payments may be applied to required principal payments. However, the Company intends on making quarterly payments of \$4.0 million, which are reflected in the current portion of long-term debt at March 31, 2012.

Borrowings under the term loan bear interest, payable at least quarterly. Borrowings under the revolving credit facility (excluding letters of credit) bear interest, payable at least quarterly. We also pay a 0.5% commitment fee per annum on the unused portion of the revolver. The fee for letter of credit amounts outstanding is 3.0%. The revolving credit facility expires in November 2015. As of March 31, 2012, borrowings under the senior credit facility bear interest at a rate per annum equal to an applicable margin plus, at our option, either (1) a base rate determined by reference to the highest of (a) the Federal Funds rate plus 0.5%, (b) the prime rate (c) the LIBOR rate plus 1.0%, and (d) 2.0% or (2) a LIBOR rate provided that LIBOR shall not be lower than 1.0%. The applicable margin under the senior credit facility is 2.0% for loans based upon the base rate and 3.0% for loans based upon the LIBOR rate.

Table of Contents

The senior credit facility requires us to comply on a quarterly basis with certain financial covenants, including a maximum ratio (the “leverage ratio”) of debt to adjusted earnings before interest, taxes, depreciation, and amortization (“EBITDA”) and a minimum ratio (the “interest coverage ratio”) of adjusted EBITDA to interest expense, each of which becomes more restrictive over time. For the first quarter of fiscal year 2012, the terms of the senior credit facility require that we maintain a leverage ratio of no more than 8.60 to 1.00 and a minimum interest coverage ratio of 1.45 to 1.00. The leverage ratio financial covenant will become more restrictive over time and will require us to maintain a leverage ratio of no more than 6.25 to 1.00 by the second quarter of fiscal year 2017. The interest coverage ratio financial covenant will also become more restrictive over time and will require us to maintain an interest coverage ratio of no less than 1.95 to 1.00 by the second quarter of fiscal year 2017. Failure to comply with either of these covenants would result in an event of default under our senior credit facility unless waived by our senior credit facility lenders. An event of default under our senior credit facility can result in the acceleration of our indebtedness under the facility. Adjusted EBITDA is a non-GAAP measure used to determine our compliance with certain covenants contained in our senior credit facility, including our leverage ratio. Adjusted EBITDA is defined in our senior credit facility as net income/(loss) before interest, taxes, depreciation and amortization and impairment of long-lived assets, as adjusted for the items summarized in the table below. Adjusted EBITDA is not a presentation made in accordance with GAAP, and our use of the term adjusted EBITDA varies from others in our industry due to the potential inconsistencies in the method of calculation and differences due to items subject to interpretation. Adjusted EBITDA should not be considered as an alternative to net income, operating income or any other performance measures derived in accordance with GAAP, as a measure of operating performance or as an alternative to cash flows as a measure of liquidity. Adjusted EBITDA has important limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. Because of these limitations we rely primarily on our GAAP results. However, we believe that presenting adjusted EBITDA is appropriate to provide additional information to investors to demonstrate compliance with our financing covenants. As of March 31, 2012, we were in compliance with our senior credit facility financial covenants, including a leverage ratio of 4.24 to 1.00 and an interest coverage ratio of 4.01 to 1.00, which were calculated for the twelve months ended March 31, 2012 based upon the adjustments to EBITDA, as provided for under the terms of our senior credit facility. The following is a reconciliation of our net income to such adjusted EBITDA for the twelve months ended March 31, 2012 (in thousands):

| | Twelve months ended March 31, 2012 |
|---|---------------------------------------|
| Net income attributable to Dunkin’ Brands | \$ 62,079 |
| Interest expense | 87,886 |
| Income tax expense | 42,873 |
| Depreciation and amortization | 52,368 |
| Impairment charges | 1,416 |
| Korea joint venture impairment, net ^(a) | 18,776 |
| EBITDA | 265,398 |

| Other ^(g) | 8,789 |
| Total adjustments | 57,859 |
| Adjusted EBITDA | \$ 323,257 |

- (a) Represents an impairment of the investment in the Korea joint venture of \$19.8 million, less a reduction in depreciation and amortization, net of tax, of \$1.0 million resulting from the allocation of the impairment charge to the underlying intangible and long-lived assets of the joint venture during the three months ended December 31, 2011.
- (b) Represents non-cash adjustments, including stock compensation expense, legal reserves, and other non-cash gains and losses.
- (c) Represents direct and indirect cost and expenses related to the Company’s refinancing, initial public offering, and secondary offering transactions.
- (d) Represents annual fees paid to the Sponsors under a management agreement, which terminated upon the consummation of the initial public offering in July 2011, and includes \$14.7 million in fees related to such termination.
- (e) Represents gains/losses recorded and related transaction costs associated with the refinancing and repayment of long-term debt, including the write-off of deferred financing costs and original issue discount, as well as pre-payment premiums.
- (f) Represents severance and related benefits costs associated with non-recurring reorganizations.
- (g) Represents one-time costs and fees associated with entry into new markets, costs associated with various franchisee-related information technology investments and one-time market research programs, and the net impact of other non-recurring and individually insignificant adjustments.

Based upon our current level of operations and anticipated growth, we believe that the cash generated from our operations and amounts available under our revolving credit facility will be adequate to meet our anticipated debt service requirements, capital expenditures and working capital needs for at least the next twelve months. We believe that we will be able to meet these obligations even if we experience no growth in sales or profits. There can be no assurance, however, that our business will generate sufficient cash flows from operations or that future borrowings will be available under our revolving credit facility or otherwise to enable us to service our indebtedness, including our senior secured credit facility, or to make anticipated capital expenditures. Our future operating performance and our ability to service, extend or refinance the senior secured credit facility will be subject to future economic conditions and to financial, business and other factors, many of which are beyond our control.

Recently Issued Accounting Standards

In September 2011, the Financial Accounting Standards Board (“FASB”) issued new guidance, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit’s fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes that it is not more likely than not that

[Table of Contents](#)

the fair value of a reporting unit is less than its carrying amount, it would not need to perform the two-step impairment test for that reporting unit. This guidance was effective for the Company beginning in fiscal year 2012, and will be applied when performing our annual impairment test in the third quarter of 2012. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In May 2011, the FASB issued new guidance to clarify existing fair value guidance and to develop common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with GAAP and International Financial Reporting Standards. This guidance was effective for the Company beginning in fiscal year 2012. The adoption of this guidance did not have a material impact on our consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in the foreign exchange or interest rate risks discussed in Part II, Item 7A “Quantitative and Qualitative Disclosures about Market Risk” included in our Annual Report on Form 10-K.

Item 4. Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2012. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of March 31, 2012, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective.

During the quarterly period ended March 31, 2012, there were no changes in the Company’s internal controls over financial reporting that have materially affected or are reasonably likely to affect the Company’s internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

The Company is engaged in several matters of litigation arising in the ordinary course of its business as a franchisor. Such matters include disputes related to compliance with the terms of franchise and development agreements, including claims or threats of claims of breach of contract, negligence, and other alleged violations by the Company. The Company intends to vigorously defend its positions against all claims in these lawsuits and disputes.

Item 1A. Risk Factors.

Except as set forth below, there have been no material changes from the risk factors disclosed in Part I, Item 1A “Risk Factors” included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011:

We are subject to certain phase-in provisions of the NASDAQ Marketplace Rules and, as a result, we will not immediately be subject to certain corporate governance requirements.

The Sponsors no longer control a majority of the voting power of our outstanding common stock. As a result, we are not a “controlled company” within the meaning of the corporate governance standards of The NASDAQ Global Select Market. However, we are entitled to rely on phase-in provisions for certain corporate governance requirements, including:

- the requirement that we have a nominating/ and corporate governance committee that is composed entirely of independent directors;
- the requirement that we have a compensation committee that is composed entirely of independent directors; and
- the requirement that we have a majority of independent directors on our board of directors.

[Table of Contents](#)

We intend to continue to utilize these phase-in provisions. As a result neither our compensation committee nor our nominating and corporate governance committee consist entirely of independent directors. Accordingly, you will not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of The NASDAQ Global Select Market for up to the expiration of the phase-in period on April 4, 2013.
